

Kyivstar Expands Testing of Starlink Direct to Cell Satellite Technology Throughout Ukraine

31.10.2025

KYIV, Ukraine, Oct. 31, 2025 (GLOBE NEWSWIRE) -- JSC Kyivstar ("Kyivstar"), Ukraine's leading digital operator, is initiating preparations for nationwide testing of the innovative Starlink Direct to Cell technology by SpaceX. This is the second phase of the process, which will cover all regions of Ukraine except for border areas, active combat zones, and temporarily occupied territories. The technology aims to provide critically needed connectivity in areas where terrestrial service is unavailable.

Kyivstar has received the necessary permission for testing from the **National Commission for the state regulation of electronic communications, radio frequency spectrum and the provision of postal services (NCEC)**. The testing will be conducted using frequencies that Kyivstar is licensed to operate by the national regulator.

Kyivstar believes the technology will be especially useful during prolonged blackouts, in frontline and de-occupied areas, for humanitarian demining operators, emergency services (SES), mountainous regions, and other hard-to-reach zones without mobile coverage. Additionally, Kyivstar plans to conduct testing involving subscribers and business clients, unlocking new opportunities to ensure uninterrupted connectivity and resilient business operations under challenging conditions.

"Testing Starlink Direct to Cell is an important step toward building an additional communication system that complements our terrestrial mobile infrastructure," said **Ilyia Polshakov, New Business Development Director at Kyivstar**. "The technology will enable businesses to serve customers in areas without connectivity and allow users to stay connected even in the most challenging moments. We are grateful to the regulator for its cooperation and permission to conduct the testing. This is a revolutionary step in the development of connectivity that brings the future closer. We are investing in safety and technology to maintain connectivity for Ukrainians."

Kyivstar engineers will test the technology in real-world conditions to evaluate its effectiveness across various scenarios — from emergency situations to everyday use. During the testing, Kyivstar will ensure compliance with all safety standards and maintain the quality of core mobile services throughout the entire satellite technology testing period.

"The NCEC supports the introduction of new technologies, especially those that can significantly improve the accessibility and quality of communication for people," commented **Liliia Malion, the Chairwoman of NCEC**. "During the war, the ability to stay connected becomes particularly important. At the same time, as the Regulator, we carefully monitor that the testing of new technologies does not affect the operation of existing networks, does not cause radio interference, and fully complies with all technical and regulatory requirements."

The Starlink Direct to Cell technology enables standard 4G-capable smartphones to connect directly to satellites without relying on terrestrial base stations. In the first stage of implementation, the SMS feature is expected to be available only for outdoor use, in areas with a clear, unobstructed view of the sky, at no additional cost to subscribers. Kyivstar expects future stages will introduce voice calls and mobile internet, significantly expanding the service's capabilities. By the end of 2025, all Ukrainians across the country are expected to begin testing this revolutionary technology, made available through Kyivstar.

About JSC Kyivstar

JSC Kyivstar ("Kyivstar") is Ukraine's leading digital operator, serving around 22.4 million mobile subscribers and over 1.1 million fixed-line Home internet customers as of June 30, 2025. The company provides services using a wide range of mobile and fixed technologies, including 4G, Big Data, cloud solutions, cybersecurity services, digital TV, and more. Kyivstar is advancing new telecommunication technologies in Ukraine and together with VEON plans to invest USD 1 billion in this direction during 2023–2027. Kyivstar is wholly owned by Kyivstar Group Ltd (the "Kyivstar Group") (Nasdaq: KYIV; KYIVW), the first Ukrainian company to have its shares traded on the U.S. stock exchange Nasdaq. The company contributes to overcoming the challenges of wartime and, over the past three years, has allocated more than UAH 3.4 billion to support the Defence Forces, its subscribers, and the implementation of social projects. Kyivstar has operated in Ukraine for 27 years and is recognised as the largest taxpayer in the digital communications market, a top employer, and a socially responsible company. Forward-Looking Statements

This press release contains "forward-looking statements," as the phrase is defined in Section 27A of the U.S. Securities Act of 1933, as amended, and Section 21E of the U.S. Securities Exchange Act of 1934, as amended. All statements contained in this press release that do not relate to matters of historical fact should be considered forward-looking statements, including, without limitation, statements relating to, among other things, the expected benefits and utility of Starlink Direct to Cell technology, the timing and implementation of testing of the Starlink Direct to Cell technology by Kyivstar, and the expected capabilities of Starlink Direct to Cell technology, once implemented. These statements represent Kyivstar Group's opinions, expectations, beliefs, intentions, estimates or strategies regarding the future. In some cases, forward-looking statements may be identified by the words

“anticipate,” “believe,” “estimate,” “expect,” “forecast,” “future,” “intend,” “may,” “opportunity,” “plan,” “potential,” “project,” “should,” “strategy,” “will,” “will be,” “will continue,” “will likely result,” “would” and similar expressions (including the negative versions of such words or expressions). Forward-looking statements are predictions, projections and other statements about future events that are based on current expectations and assumptions and, as a result, are subject to risks and uncertainties. These statements are based management’s current expectations. These statements are neither promises nor guarantees, but involve known and unknown risks, uncertainties and other important factors that may cause Kyivstar Group’s, actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements in this press release, including, but not limited to, the risks and uncertainties set forth in the section entitled “Risk Factors” included in the final prospectus filed by Kyivstar Group with the U.S. Securities and exchange Commission (“SEC”) on July 22, 2025, as amended and supplemented from time to time, and in any other subsequent filings with the SEC by Kyivstar Group. Forward-looking statements are inherently subject to risks and uncertainties, many of which Kyivstar Group cannot predict with accuracy and some of which Kyivstar Group might not even anticipate. The forward-looking statements contained in this press release speak only as of the date of this release. Kyivstar Group does not undertake to publicly update any forward-looking statement to reflect events or circumstances after such date or to reflect the occurrence of unanticipated events, except as required by U.S. federal securities laws.
