

Kyivstar Authorized to Resell Starlink for Businesses & Enterprises in Ukraine

06.05.2026

KYIV, Ukraine and NEW YORK, May 06, 2026 (GLOBE NEWSWIRE) -- Kyivstar Group Ltd (Nasdaq: KYIV; KYIVW), the parent company of JSC Kyivstar ("Kyivstar"), Ukraine's leading digital operator and part of VEON Group (Nasdaq: VEON), is authorized to resell Starlink services to support Ukrainian businesses. The companies have signed a new agreement that enables the official reselling of Starlink Kits and high-speed internet services to businesses and public sector institutions such as schools, universities, hospitals, and community clinics in Ukraine.

The agreement simplifies access to Starlink internet and equipment for Ukrainian businesses, enabling them to order directly from Kyivstar. Users will receive a comprehensive business service — consultation on connection and service activation, warranty support for the equipment and a 24/7 customer support line. The service is aimed at large corporations, mid-sized businesses, and manufacturing companies for which reliable connectivity in any conditions is of critical importance. Starlink will also be available to public institutions, contributing to resilient connectivity across schools, universities, hospitals, and community clinics in Ukraine. Starlink Kits and services will be available for purchase in the national currency, the hryvnia (with prices based on the official National Bank of Ukraine exchange rate). Clients will also be able to receive all necessary financial documents from Kyivstar as an authorized Starlink distributor in Ukraine, an important factor for transparent financial accounting.

Oleksandr Komarov, Chief Executive Officer of Kyivstar, stated, "This important step expands opportunities for Ukrainian businesses. We are creating a convenient and transparent channel for purchasing Starlink Kits and service from Starlink to allow stable connectivity in the most challenging conditions. This strengthens the resilience and efficiency of Ukrainian companies. In addition, we plan to develop joint offerings that combine Starlink's services with Kyivstar's core telecom services, providing businesses comprehensive solutions backed by high reliability and support."

About Starlink

Starlink is the most advanced satellite network in the world, with thousands of satellites in low Earth orbit delivering broadband connectivity even in remote regions. The service enables high-speed internet in remote regions and areas requiring additional connectivity options.

Connectivity is delivered through Starlink Kits that can be either stationary (on rooftops or in offices) or mounted on moving vehicles, ensuring internet access exactly where a business needs it. Business customers receive priority access and consistently high connection speeds, even during peak usage periods.

Starlink supports streaming, video calls, work with internal ERP and CRM systems, corporate data exchange, access to cloud services and building data channels between offices or production sites. The service can also be used to establish secure communication channels and provide redundant connectivity to ensure business continuity.

Going forward, Kyivstar plans to introduce additional services that go beyond standard telecommunications offerings, further increasing the value of its solutions for customers.

About Kyivstar Group Ltd.

Kyivstar Group Ltd. ("Kyivstar") is a Nasdaq-listed holding company that operates JSC Kyivstar, Ukraine's leading digital operator and the first Ukrainian company to list on a U.S. stock exchange.
